(7) Amend the second and the third full paragraphs on page 74 as the following:

Our net tangible book value as of March 31, 2018 was approximately US\$132.59 million, or US\$2.69 per ordinary share as of that date and US\$8.07 per ADS. Net tangible book value represents the amount of our total consolidated tangible assets, less the amount of our total consolidated liabilities. Pro forma net tangible book value per ordinary share represents our net tangible book value divided by our total number of outstanding ordinary shares, each after giving effect to (i) the automatic conversion of all of our issued and outstanding preferred shares into 755,082,770 Class A ordinary shares on a one-for-one basis and as such the derivative liabilities related to the bifurcated conversion features of our preferred shares, in the amount of RMB1,817.2 million (US\$289.0 million) as of March 31, 2018, will automatically become shareholders' equity upon completion of this offering, (ii) the issuance of 10,203,692 Class A ordinary shares upon the conversion of Fairlubo shares held by certain Fairlubo shareholders upon completion of this offering, assuming the initial public offering price of US\$11.50 per ADS, which is the midpoint of the estimated range of the initial public offering price shown on the front cover of this prospectus, see "Description of Share Capital—Securities of Fairlubo Auction Company Limited that are convertible into securities of Uxin Limited," and the derivative liabilities amounting to RMB170.2 million (US\$27.1 million) as of March 31, 2018, in relation to the share swap and redemption features of the redeemable non-controlling interests will become shareholders' equity; (iii) the grant of 17,742,890 restricted shares to Xin Gao Group Limited on May 14, 2018, which shall become vested upon completion of this offering, (iv) the surrender of 30,964,990 shares by Xin Gao Group Limited for the repayment of outstanding loans owed to us as at March 31, 2018 and settled on May 28, 2018, assuming the initial public offering price of US\$11.50 per ADS, which is the midpoint of the estimated range of the initial public offering price shown on the front cover of this prospectus. Because the Class A ordinary shares and Class B ordinary shares have the same dividend and other rights, except for voting and conversion rights, the dilution is presented based on all ordinary shares, including Class A ordinary shares and Class B ordinary shares.

Without taking into account any other changes in net tangible book value after March 31, 2018, other than to give effect to (i) the automatic conversion of all of our issued and outstanding preferred shares into 755,082,770 Class A ordinary shares on a one-for-one basis and as such the derivative liabilities related to the bifurcated conversion features of our preferred shares, in the amount of RMB1,817.2 million (US\$289.0 million) as of March 31, 2018, will automatically become shareholders'

equity upon completion of this offering, (ii) the issuance of 10,203,692 Class A ordinary shares upon the conversion of Fairlubo shares held by certain Fairlubo shareholders upon completion of this offering, assuming the initial public offering price of US\$11.50 per ADS, which is the midpoint of the estimated range of the initial public offering price shown on the front cover of this prospectus, and the derivative liabilities amounting to RMB170.2 million (US\$27.1 million) as of March 31, 2018, in relation to the share swap and redemption features of the redeemable non-controlling interests will become shareholders' equity; (iii) the grant of 17,742,890 restricted shares to Xin Gao Group Limited on May 14, 2018, which shall become vested upon completion of this offering, (iv) the surrender of 30,964,990 shares by Xin Gao Group Limited for the repayment of outstanding loans owed to us as at March 31, 2018 and settled on May 28, 2018, assuming the initial public offering price of US\$11.50 per ADS, which is the midpoint of the estimated range of the initial public offering price shown on the front cover of this prospectus, (v) the exercise of vested stock options (including accelerated vesting to certain stock options) by one of the Company's executive officers to acquire total 5,000,000 ordinary shares of the Company on May 25, 2018, and (vi) the sale of 114,000,000 Class A ordinary shares in the form of ADSs by us in this offering at an assumed initial public offering price of US\$11.50 per ADS, which is the midpoint of the estimated range of the initial public offering price shown on the front cover of this prospectus, after deducting the underwriting discounts and commissions and estimated offering expenses payable by us, assuming the underwriters do not exercise over-allotment option, our pro forma as adjusted net tangible book value as of March 31, 2018 would have been US\$748.17 million, or US\$0.81 per ordinary share and US\$ 2.43 per ADS. This represents an immediate decrease in net tangible book value of US\$1.88 per ordinary share and US\$5.64 per ADS to the existing shareholders and an immediate dilution in net tangible book value of US\$3.02 per ordinary share and US\$9.07 per ADS to investors purchasing ADSs in this offering. The following table illustrates such dilution:

(8) Amend the last paragraph on page 76 as the following:

The pro forma as adjusted information does not include the impact of the issuance of convertible notes to certain third party investors, which shall be consummated concurrently with the closing of this offering. The investors may elect to convert their respective convertible notes into Class A ordinary shares from the 181st day after the date of this prospectus, see "Prospectus Summary—The Offering."

(9) Add the following to the end of the third paragraph on page 78:

The deposit agreement among us, the depository, ADS holders and other parties thereto is not one of our constituent documents.

(14) Add the following to the end of footnote (3) on page 174:

A total of 71,032,978 ordinary shares on an as-converted basis are attributable to the Jeneration Capital Affiliated Entities through their direct ownership interests in our shares and their ownership interests in Kingkey New Era Auto Industry Limited, Kingkey New Era Auto Industry Global Limited and BOCOM International Supreme Investment Limited, representing approximately 8.9% of our total ordinary shares on an as-converted basis as of the date of this prospectus.

The deposit agreement gives the depository or an ADS holder asserting a claim against us the right to require us to submit that claim to binding arbitration in New York under the Rules of the American Arbitration Association, including any United States federal securities law claim. However, a claimant could also elect not to submit its claim to arbitration and instead bring its claim in any court having jurisdiction of it. The deposit agreement does not give us the right to require anyone to submit any claim to arbitration.

(16) Add the following after the second full paragraph on page 213:

Notwithstanding the restrictions described in the preceding paragraph, certain of our shareholders, including Mr. Kun Dai, our chairman and chief executive officer, have pledged shares that represent 18.9% of our pre-offering share capital (or 16.3% of our post-offering share capital assuming the underwriters do not exercise over-allotment option) in favor of third party lenders in connection with certain loan agreements entered into in 2017 with a term of two years, most proceeds of which were used to fund the purchase of shares in the Company in the latest rounds of pre-IPO equity financings. See "Principal Shareholders," footnote (1). If any lender enforces its security interests in such pledged shares upon an event of default, the pledged shares can be sold without regard to the lock-up restrictions. The loan agreements do not have margin call requirements or top-up obligations regarding our shares.

CNCB (Hong Kong) and Golden Fortune may elect to convert their respective Notes into Class A ordinary shares from the 181st day after the date of this prospectus with conversion price per ordinary shares equal to 109.5% and 108% of the initial public offering price per ordinary share, respectively.

(20) Amend Note 32 on pages F-140 and F-141 as the following:

Upon the completion of a qualified initial public offering, the Series A, A-1, B, C, D, E, F, G and G-Plus Preferred Shares shall automatically be converted into Class A ordinary shares, and as such the derivative liabilities related to the bifurcated conversion features of our preferred shares will automatically become shareholders' equity.

Upon the completion of this offering, the Fairlubo shares owned by certain Fairlubo shareholders will be converted into the Class A ordinary shares and the derivative liabilities in relation to the share

swap and redemption features of the redeemable non-controlling interests will become shareholders' equity.

The unaudited pro-forma balance sheet as of March 31, 2018 assumes a qualified initial public offering has occurred and presents an adjusted financial position as if the conversion of all outstanding Series A, A-1, B, C, D, E, F, G and G-Plus Preferred Shares into Class A ordinary shares at the conversion ratio as described in Note 23 to the unaudited interim condensed consolidated financial statements and conversion of the Fairlubo shares into Class A ordinary shares as described in Note 31 to the unaudited interim condensed consolidated financial statements occurred on March 31, 2018.

Unaudited pro-forma basic and diluted net loss per share was computed to give effect to the automatic conversion of the Series A, A-1, B, C, D, E, F, G and G-Plus Preferred Shares using the "if converted" method as though the conversion had occurred as of the beginning of the period or the original date of issuance, if later.

In addition to these conversion effects of the Preferred Shares, the unaudited pro-forma balance sheet as of March 31, 2018 and the unaudited pro-forma basic and diluted net loss per share for the three months ended March 31, 2018 also reflect pro-forma effect of the issuance and vest of restricted shares to Xin Gao Group (Note 31(a)) as if the qualified initial public offering has occurred on March 31, 2018, the pro-forma effect of the Company's repurchase of the Surrender Shares (Note 31(b)), as well as the pro-forma effect of Fairlubo Share Swap (Note 31(d)).
