## Uxin Delivers a Strong Performance in December 2018

Uxin Limited (“Uxin” or the “Company”) (Nasdaq: UXIN) has completed the year of 2018 with a strong performance in December 2018. During the month, Uxin’s total transaction volume across all businesses is estimated to exceed 100,000 units, representing approximately 44% growth from December 2017, and the 2C cross-regional transaction volume is estimated to exceed 10,000 units, which was more than 75 times higher than that of the same period in 2017. The Company believes that the significant volume of the cross-regional transactions demonstrates the effectiveness of Uxin’s transparent transaction process and consumer protection policies, which enables more consumers to make their purchasing decisions online. Uxin’s unique value propositions to China’s used car buyers in turn provide the Company with additional monetization opportunities, including differentiated pricing mechanisms and potential to attach more value-added services.

With a robust growth of transaction volume and increasing contribution from the 2C cross-regional business, the Company’s total revenues in December 2018 are estimated to surpass RMB400 million, which represented an approximately 75% increase from December 2017, and the Company also turned profitable for the first time during the month.

The estimated financial figures above are based on management account and are subject to further audit adjustment.
