

# Uxin Reports Unaudited Fourth Quarter and Fiscal Year 2024 Financial Results

BEIJING, July 31, 2024 /PRNewswire/ -- Uxin Limited ("Uxin" or the "Company") (Nasdaq: UXIN), China's leading used car retailer, today announced its unaudited financial results for the fourth quarter and fiscal year ended March 31, 2024.

Dear Shareholders,

First and foremost, on behalf of Uxin, I would like to extend our heartfelt gratitude for your unwavering support and trust. It is my pleasure to share with you the remarkable business progress we have made over the past fiscal year, as well as our strategic outlook for the future through this shareholder letter.

The current economic landscape in China is entering a new phase of development, bringing numerous challenges to various industries, including the used car sector. Notably, the competitive pricing strategies initiated by car manufacturers early last year have severely disrupted the price structure of the used car market, leading to a substantial decline in profitability across the industry.

However, we are pleased to see opportunities amidst these challenges. Over the past year, China's used car market has continued its rapid growth trajectory, with national used car transactions surpassing 18 million units in 2023, reflecting a near 15% year-over-year increase. The government's series of favorable policies to encourage the development of the used car industry, coupled with substantial incentives for trading in old cars for new ones, have spurred consumption growth in the sector. In an increasingly complex and dynamic operating environment, resources are beginning to concentrate towards leading used car dealers, providing long-term sustainable growth and profitability opportunities for companies that excel in scale, branding, and efficiency.

Uxin's unique business model, characterized by our flagship used car superstores, has demonstrated strong competitive advantages across various dimensions, becoming increasingly prominent in the cities where our superstores are located. In the four quarters of fiscal year 2024, our retail sales continued to grow, with a total of 10,179 units sold throughout the year. From January to March 2024, even during the traditional slow season of the Spring Festival, we achieved retail sales of 3,124 units, a 38% increase compared to the same period last year. Our superstores have become the leading brand in their respective regions, with a Net Promoter Score (NPS) consistently around 60 points for 10 consecutive quarters, the highest level in the industry, and a regional market share of 10% and growing. Our overall vehicle inventory turnover days are around 30 days, and our standardized, streamlined, and digitalized operating system has matured over the past year, significantly surpassing the industry average in operational capability and efficiency.

Reflecting on the past year, we have made substantial progress in numerous areas of our business, positioning us well for scalable profitability. I will highlight three key achievements:

First, our branding and sales capabilities have generated a positive flywheel effect, further enhancing sales efficiency. By connecting with customers through superior products and services, we have built a stronger network effect in regional markets as customer trust and reputation have grown, further boosting sales conversion rates. As a result, our in-store customer conversion rate has reached approximately 40%. Despite intense industry competition, our retail vehicle inventory turnover rate has improved by over 60% compared to the previous fiscal year, allowing us to achieve higher retail sales with the same inventory size.

Uxin's decade-long industry experience has greatly empowered our sales capabilities through digitalization. Our AI pricing model dynamically monitors six hundred thousands of used car data points across the internet, creating competitive models based on factors such as a car's model, age, condition, and mileage. This system, combined with customer viewing records and offline test drives, can generate purchase and sale prices and adjust them promptly to ensure Uxin's vehicles remain highly competitive in the market. During the new car price cuts, our pricing system responded quickly to adjust the acquisition and selling prices of similar models to accelerate the sales of impacted inventories. By adjusting our prices faster, we can accelerate vehicle sales, mitigate the effects of new car price reductions, and transition into the next regular sales cycle sooner.

Second, while increasing sales volume, we have also boosted our gross profit per vehicle. Our gross profit margin has risen from 1.2% in fiscal year 2023 to 5.9% in fiscal year 2024. In the used car industry, prices typically decrease as inventory ages. Therefore, by accelerating our sales turnover, we have naturally enhanced our gross profit per vehicle.

Meanwhile, leveraging our one-stop shopping experience at offline superstores and reconditioning factories, we have continuously expanded our high-margin value-added services. These include financing services, insurance, extended warranties, premium accessories, and maintenance. Over the past year, the penetration rate of these value-added services has rapidly increased, boosting our gross profit margin.

Additionally, our per-vehicle reconditioning costs have significantly decreased. Uxin's transparent factory is now fully operational, with vehicles taking an average of only three days to move from warehousing to sales, allowing for faster sales entry. Through bulk procurement of parts, SMART repairs, and the application of 3D printing technology, our reconditioning cost per vehicle in fiscal year 2024 has decreased by 50% compared to the previous fiscal year.

Third, we have continued to reduce costs, improve efficiency, and optimize our operating expenses. Adjusted EBITDA<sup>(1)</sup> for fiscal year 2024 was a loss of RMB176 million, representing a nearly 40% reduction in losses compared to fiscal year 2023. This year, we implemented a series of cost-reduction and efficiency-enhancement measures. Looking forward, we expect fixed costs and expenses in fiscal year 2025 to be reduced by over RMB100 million compared to fiscal year 2024, driving faster overall Adjusted EBITDA profitability at the company level.

Take marketing as an example, we have developed a highly cost-effective customer acquisition strategy, reducing advertising and promotion expenses by more than 50% compared to last year. Leveraging our large venues, we actively explored community-integrated marketing strategies by organizing events such as sports meetings, anime conventions, job fairs, and vehicle test drives etc. These activities increased our regional market exposure, generating substantial organic traffic and significantly lowering customer acquisition costs.

In the past year, our offline superstore model has proven successful, placing Uxin on a rapid growth trajectory. Looking ahead to the new fiscal year, we have set three primary business objectives, aligning with our current development plan.

First, we aim to significantly increase sales volume, projecting a year-over-year retail sales growth of 150% for fiscal year 2025. We are confident in maintaining our current sales efficiency and will gradually ramp up inventory, expecting inventory levels to increase 2-3 times compared to the beginning of the fiscal year. This will drive continuous retail sales growth in the coming quarters, ensuring the achievement of our sales targets for the new fiscal year.

Second, we plan to achieve company-wide profitability at scale. Our goal is to achieve positive Adjusted EBITDA for the entire company in the quarter between October and December 2024. With new car prices stabilizing, the profitability of used cars is beginning to recover, and our inventory scales and sales continue to climb. We are confident in meeting this profitability target.

Third, we will finalize the location selection and operational preparations for 2-3 new superstores, enhancing our integrated online and offline superstore network. Recently, we announced a strategic partnership with the Zhengzhou Airport District government, with a joint investment of RMB170 million to establish a new Uxin used car superstore in Zhengzhou city. As a transportation hub in central China and one of the most active cities for used car transactions, Zhengzhou boasts a population of over 13 million and a car ownership of 5 million, making it an ideal location for operating a large-scale used car superstore. Besides Zhengzhou, we are also advancing implementation plans in several other cities, which will drive Uxin's national expansion and business growth in the coming years.

Everything is in place for us to achieve our goals. We have confidence in the competitive advantage of Uxin's superstore model and the momentum driving our business growth. We remain dedicated to leading the transformation and upgrading of China's used car industry with a steadfast commitment to customer-centric value creation. Once again, we sincerely thank you for your continued trust and support. We look forward to achieving new breakthroughs together in the coming fiscal year.

Kun Dai

Chairman and Chief Executive Officer of Uxin

See our Financial Supplement, filed as Exhibit 99.1 to our Current Report on Form 6-K on July 31, 2024 with the SEC, "Unaudited Reconciliations of GAAP And Non-GAAP Results" for a reconciliation and additional information on non-GAAP measures.

## Highlights for the Quarter Ended March 31, 2024

- **Transaction volume** was 4,058 units for the three months ended March 31, 2024, a decrease of 6.8% from 4,354 units in the last quarter and an increase of 12.5% from 3,607 units in the same period last year.
- **Retail transaction volume** was 3,124 units, an increase of 1.4% from 3,081 units in the last quarter and an increase of 38.3% from 2,259 units in the same period last year.
- **Total revenues** were RMB319.2 million (US\$44.2 million) for the three months ended March 31, 2024, a decrease of 22.3% from RMB410.5 million in the last quarter and a decrease of 7.2% from RMB343.8 million in the same period last year.

- **Gross margin** was 6.6% for the three months ended March 31, 2024, compared with 4.8% in the last quarter and 2.3% in the same period last year.
- **Loss from operations** was RMB109.8 million (US\$15.2 million) for the three months ended March 31, 2024, compared with RMB73.1 million in the last quarter and RMB57.4 million in the same period last year.
- **Non-GAAP adjusted EBITDA** was a loss of RMB39.7 million (US\$5.5 million), compared with a loss of RMB43.8 million in the last quarter and a loss of RMB40.8 million in the same period last year.

#### **Highlights for the Fiscal Year Ended March 31, 2024**

- **Transaction volume** was 15,550 units for the fiscal year ended March 31, 2024, a decrease of 22.4% from 20,029 units in the prior fiscal year.
- **Retail transaction volume** was 10,179 units for the fiscal year ended March 31, 2024, a decrease of 4.9% from 10,703 units in the prior fiscal year.
- **Total revenues** were RMB1,374.7 million (US\$190.4 million) for the fiscal year ended March 31, 2024, a decrease of 33.2% from RMB2,059.2 million in the prior fiscal year.
- **Gross margin** was 5.9% for the fiscal year ended March 31, 2024, compared with 1.2% in the prior fiscal year.
- **Loss from operations** was RMB312.5 million (US\$43.3 million) for the fiscal year ended March 31, 2024, compared with RMB356.9 million in the prior fiscal year.
- **Non-GAAP adjusted EBITDA** was a loss of RMB176.1 million (US\$24.4 million) for the fiscal year ended March 31, 2024, compared with RMB280.3 million in the prior fiscal year.

Mr. Feng Lin, Chief Financial Officer of Uxin, stated, "Despite the traditional slow season for used car sales in China due to the Chinese New Year holiday, we continued to deliver solid results in the quarter, with retail transaction volume reaching 3,124 units, representing a 38% year-over-year increase. Additionally, the improvement in vehicle turnover and the increased penetration of value-added services significantly enhanced our profitability. As a result, our gross profit margin in the quarter was 6.6%, an improvement of 1.8 percentage points from the previous quarter."

Mr. Lin added, "For the full fiscal year of 2024, we achieved a retail transaction volume of 10,179 units, and narrowed our Adjusted EBITDA loss by RMB104 million compared to the previous fiscal year to RMB176 million. We have started to expand our inventory levels, and we expect retail sales to continue growing in the coming quarters. Looking ahead to fiscal year 2025, we anticipate a year-over-year retail transaction volume growth by 150% with a further reduction in fixed costs by over RMB100 million year-over-year. We are fully committed to achieving company-wide Adjusted EBITDA profitability starting from the third quarter of the fiscal year."

#### **Financial Results for the Quarter Ended March 31, 2024**

**Total revenues** were RMB319.2 million (US\$44.2 million) for the three months ended March 31, 2024, a decrease of 22.3% from RMB410.5 million in the last quarter and a decrease of 7.2% from RMB343.8 million in the same period last year. The quarter-over-quarter decreases were mainly due to the decline of wholesale transaction volume as well as the decrease in vehicle average selling price. The year-over-year decreases were mainly due to the decline of wholesale vehicle sales revenue.

**Retail vehicle sales revenue** was RMB269.4 million (US\$37.3 million) for the three months ended March 31, 2024, representing a decrease of 15.6% from RMB319.2 million in the last quarter and an increase of 2.2% from RMB263.7 million in the same period last year. For the three months ended March 31, 2024, retail transaction volume was 3,124 units, an increase of 1.4% from 3,081 units last quarter and an increase of 38.3% from 2,259 units in the same period last year. The Chinese New Year was on February 9, 2024, which is the traditional used car off-season. However, the quarter-over-quarter retail transaction volume maintained stable. The quarter-over-quarter decrease in retail vehicle sales was mainly due to the decline of retail average selling price. The year-over-year increase was mainly due to the retail transaction volume increase by 38.3% while partially offset by the decline of retail average selling price.

**Wholesale vehicle sales revenue** was RMB39.7 million (US\$5.5 million) for the three months ended March 31, 2024, compared with RMB82.2 million in the last quarter and RMB73.6 million in the same period last year. For the three months ended March 31, 2024, wholesale transaction volume was 934 units, representing a decrease of 26.6% from 1,273 units last quarter and a decrease of 30.7% from 1,348 units in the same period last year. Wholesale vehicle sales refer to vehicles purchased by the Company from individuals that do not meet the Company's retail standards and are subsequently sold through online and offline channels. The quarter-over-quarter decreases in wholesale vehicle sales were mainly due to the decline of wholesale vehicle sales volume during the traditional used car off-season. In addition, as the Company continued to improve its inventory capacity and reconditioning capabilities, an increased number of acquired vehicles were reconditioned to meet the Company's retail standards, rather than being sold through wholesale channels. As a result, the year-over-year wholesale vehicle sales revenue decreased.

**Other revenue** was RMB10.1 million (US\$1.4 million) for the three months ended March 31, 2024, compared with RMB9.1 million in the last quarter and RMB6.5 million in the same period last year. The year-over-year increase was mainly due to an increase in the value-added services such as revenue from sales of vehicle accessories and revenue from vehicle repair services.

**Cost of revenues** was RMB298.1 million (US\$41.3 million) for the three months ended March 31, 2024, compared with RMB390.6 million in the last quarter and RMB336.0 million in the same period last year.

**Gross margin** was 6.6% for the three months ended March 31, 2024, compared with 4.8% in the last quarter and 2.3% in the same period last year. The quarter-over-quarter increase in gross margin was mainly due to the Company's capacity to respond to market fluctuations enhanced and the Company's pricing adjustments became more prompt. The year-over-year increase in gross margin was mainly due to the acceleration of the inventory turnover rate and the improvement of pricing and sales capabilities.

**Total operating expenses** were RMB131.8 million (US\$18.3 million) for the three months ended March 31, 2024. Total operating expenses excluding the impact of share-based compensation were RMB91.4 million.

- **Sales and marketing expenses** were RMB50.8 million (US\$7.0 million) for the three months ended March 31, 2024, a decrease of 10.4% from RMB56.7 million in the last quarter and a decrease of 3.0% from RMB52.4 million in the same period last year.
- **General and administrative expenses** were RMB75.3 million (US\$10.4 million) for the three months ended March 31, 2024, representing an increase of 122.7% from RMB33.8 million in the last quarter and an increase of 96.7% from RMB38.3 million in the same period last year. The increase was mainly due to an increase in shared-based compensation for personnel performing general and administrative functions, including the share-based compensation expense of US\$4.0 million (equivalent to RMB28.7 million) resulting from the issuance of the senior convertible preferred shares to Xin Gao Group Limited ("Xin Gao"), which is controlled by Mr. Kun Dai, the Chairman of the Board of Directors and Chief Executive Officer of the Company.
- **Research and development expenses** were RMB6.0 million (US\$0.8 million) for the three months ended March 31, 2024, representing a decrease of 37.9% from RMB9.7 million in the last quarter and a decrease of 35.4% from RMB9.3 million in the same period last year. The decrease was mainly due to a decrease of the salaries and benefits expenses of employees engaged in research and development.

**Other operating income, net** was a gain of RMB0.9 million (US\$0.1 million) for the three months ended March 31, 2024, compared with a gain of RMB6.9 million in the last quarter. The decrease was mainly due to the reduction in liability waiver gain, which was recognized as the Company fulfilled its payment conditions under the operating payable waiver agreements the Company had entered into with several suppliers.

**Loss from operations** was RMB109.8 million (US\$15.2 million) for the three months ended March 31, 2024, compared with RMB73.1 million in the last quarter and RMB57.4 million in the same period last year.

**Interest expenses** were RMB24.0 million (US\$3.3 million) for the three months ended March 31, 2024, representing a decrease of 7.1% from RMB25.8 million in the last quarter and an increase of 322.3% from RMB5.7 million in the same period last year. The year-over-year increase was mainly due to the interest expenses on finance lease liabilities relating to the lease of Hefei Superstore in September 2023.

**Fair value impact of the issuance of senior convertible preferred shares** was nil for the three months ended March 31, 2024, compared with a gain of RMB20.1 million in the last quarter.

**Net loss from operations** was net loss of RMB142.7 million (US\$19.8 million) for the three months ended March 31, 2024, compared with net loss of RMB78.1 million in the last quarter and net loss of RMB79.8 million in the same period last year.

**Non-GAAP adjusted EBITDA** was a loss of RMB39.7 million (US\$5.5 million) for the three months ended March 31, 2024, compared with a loss of RMB43.8 million in the last quarter and a loss of RMB40.8 million in the same period last year.

In order to cope with the intensified competition within the industry and the challenging external conditions, following the Spring Festival, the Company executed a series of initiatives to realign its organizational structure to better meet the development needs of its superstores and to further reduce company-wide costs and expenses. The Company defines Adjusted EBITDA as EBITDA excluding the severance payment and other realignment related charges recorded in general and administrative expenses and other operating income, net relating to the aforementioned structure realignment.

## **Financial Results for the Fiscal Year Ended March 31, 2024**

**Total revenues** were RMB1,374.7 million (US\$190.4 million) for the fiscal year ended March 31, 2024, a decrease of 33.2% from RMB2,059.2 million in the prior fiscal year. The decreases were driven by the decrease of wholesale vehicle sales revenue, mainly due to a decline in wholesale transaction volume, and the decrease of retail vehicle sales revenue, mainly due to a decline in retail average selling price.

**Retail vehicle sales revenue** was RMB1,024.4 million (US\$141.9 million) for the fiscal year ended March 31, 2024, representing a decrease of 22.0% from RMB1,312.9 million in the prior fiscal year. For the fiscal year ended March 31, 2024, retail transaction volume was 10,179 units, a decrease of 4.9% from 10,703 units in the prior fiscal year. The decrease in retail vehicle sales revenue was mainly due to a decline in retail average selling price by 18.0% year-over-year. Besides, the decrease in retail vehicle sales revenue was also driven by a decline in retail transaction volume. The decrease in retail transaction volume was mainly related to the lower inventory level. The Company has maintained a prudent inventory procurement strategy and keeps a low inventory level as compared with the same period last year, which constrained retail sales growth.

**Wholesale vehicle sales revenue** was RMB315.9 million (US\$43.8 million) for the fiscal year ended March 31, 2024, compared with RMB707.4 million in the prior fiscal year. For the fiscal year ended March 31, 2024, wholesale transaction volume was 5,371 units, representing a decrease of 42.4% from 9,326 units in the prior fiscal year. Wholesale vehicle sales refer to vehicles purchased by the Company from individuals that do not meet the Company's retail standards and are subsequently sold through online and offline channels. As the Company is focusing on creating value for its customers through retail transactions and continuing to improve its inventory capacity and reconditioning capabilities, the wholesale transaction volume decreased accordingly. The Company expects that its wholesale transaction volume will gradually represent a lower portion of the Company's total transaction volume.

**Other revenue** was RMB34.4 million (US\$4.7 million) for the fiscal year ended March 31, 2024, compared with RMB38.9 million in the prior fiscal year. The decrease was mainly due to a decrease in the Company's value-added services such as rebate received from certain financing partners for referring them to the Company's retail customers with financing needs, a decrease in revenue from sales of vehicle accessories and a decrease in revenue from vehicle repair services.

**Cost of revenues** was RMB1,294.2 million (US\$179.2 million) for the fiscal year ended March 31, 2024, compared with RMB2,033.8 million in the prior fiscal year. The decrease was mainly due to a decrease in cost for acquiring used vehicles as a result of the Company's prudent inventory procurement strategy implemented.

**Gross margin** was 5.9% for the fiscal year ended March 31, 2024, compared with 1.2% in the prior fiscal year. The increase was mainly due to the acceleration of the inventory turnover rate, the improvement of pricing and sales capabilities, the increase of the Company's value-added services penetration rate and the decrease of the Company's per-vehicle reconditioning costs.

**Total operating expenses** were RMB411.1 million (US\$56.9 million) for the fiscal year ended March 31, 2024. Total operating expenses excluding the impact of share-based compensation were RMB335.3 million.

- **Sales and marketing expenses** were RMB202.5 million (US\$28.0 million) for the fiscal year ended March 31, 2024, representing a decrease of 14.3% from RMB236.3 million in the prior fiscal year. The decrease was mainly due to the decrease in marketing expenses driven by the adoption of more cost-effective promotion measures and the decrease of outbound logistic expenses, partially offset by the increase in right-of-use assets depreciation expenses as a result of relocation to the Company's Hefei Superstore.
- **General and administrative expenses** were RMB177.4 million (US\$24.6 million) for the fiscal year ended March 31, 2024, representing an increase of 7.8% from RMB164.5 million in the prior fiscal year. The increase was mainly due to an increase in share-based compensation for personnel performing general and administrative functions, including the share-based compensation expense of US\$4.0 million (equivalent to RMB28.7 million) resulting from the issuance of the senior convertible preferred shares to Xin Gao, which is controlled by Mr. Kun Dai, the Chairman of the Board of Directors and Chief Executive Officer of the Company.
- **Research and development expenses** were RMB33.8 million (US\$4.7 million) for the fiscal year ended March 31, 2024, representing a decrease of 10.3% from RMB37.7 million in the prior fiscal year. The decrease was mainly due to a decrease of the salaries and benefits expenses of employees engaged in research and development.

**Other operating income, net** was RMB18.0 million (US\$2.5 million) for the fiscal year ended March 31, 2024, compared with RMB70.0 million in the prior fiscal year.

**Loss from operations** was RMB312.5 million (US\$43.3 million) for the fiscal year ended March 31, 2024, compared with RMB356.9 million in the prior fiscal year.

**Interest expenses** were RMB62.6 million (US\$8.7 million) for the fiscal year ended March 31, 2024, representing an increase of 194.7% from RMB21.2 million in the prior fiscal year.

**Fair value impact of the issuance of senior convertible preferred shares** resulted in a loss of RMB11.8 million (US\$1.6 million) for the fiscal year ended March 31, 2024, compared with a gain of RMB242.7 million in the prior fiscal year. The impact was mainly due to the fair value change of the warrants issued in relation to the senior convertible preferred shares during the period. The warrants to purchase 261,810,806 senior convertible preferred shares held by Alpha were terminated in December 2023. The fair value impact was a non-cash gain.

**Net loss from operations** was net loss of RMB369.5 million (US\$51.2 million) for the fiscal year ended March 31, 2024, compared with net loss of RMB137.2 million in the prior fiscal year.

**Non-GAAP adjusted EBITDA** was a loss of RMB176.1 million (US\$24.4 million) for the fiscal year ended March 31, 2024, compared with a loss of RMB280.3 million in the prior fiscal year.

## **Liquidity**

As of March 31, 2024, the Company had cash and cash equivalents of RMB23.3 million, compared to RMB92.7 million as of March 31, 2023.

The Company has incurred accumulated and recurring losses from operations, and cash outflows from operating activities. In addition, the Company's current liabilities exceeded its current assets by approximately RMB658.8 million as of March 31, 2024.

The Company's ability to continue as a going concern is dependent on management's ability to increase sales, achieve higher gross profit margin and control operating costs and expenses to reduce the cash that will be used in operating cash flows, and to enter into financing arrangements, including but not limited to renewal of the existing borrowings and obtaining new debt and equity financings. There is uncertainty regarding the implementation of these business and financing plans, which raises substantial doubt about the Company's ability to continue as a going concern. The accompanying unaudited financial information does not include any adjustment that is reflective of these uncertainties.

## **Recent Development**

On July 8, 2024, the Company, through its wholly-owned subsidiary Uxin (Anhui) Industrial Investment Co., Ltd., or Uxin Anhui, entered into an equity investment agreement with Zhengzhou Airport Automobile Industry Co., Ltd., or Zhengzhou Airport Industry, to establish a subsidiary of the Company, Uxin (Zhengzhou) Intelligent Remanufacturing Co., Ltd., or Uxin Zhengzhou, in Zhengzhou. Uxin Anhui will contribute RMB120.0 million and Zhengzhou Airport Industry will contribute RMB50.0 million, representing approximately 70% and 30% of Uxin Zhengzhou's total registered capital, respectively.

Uxin Zhengzhou aims to support Uxin's plan to establish a new used car super store in Zhengzhou. This initiative is a key collaboration between Uxin and Zhengzhou Airport Industry to promote the development of the automotive aftermarket industry in the Henan Province and to build a leading brand in China's used car industry.

## **Business Outlook**

For the three months ended June 30, 2024, the Company expects its retail transaction volume to be around 4,000 units and wholesale transaction volume to be around 1,500 units. The Company estimates that its total revenues including retail vehicle sales revenue, wholesale vehicle sales revenue and value-add-services revenue to be within the range of RMB390 million to RMB410 million. The Company expects its gross profit margin to remain stable. These forecasts reflect the Company's current and preliminary views on the market and operational conditions, which are subject to changes.

## **Conference Call**

Uxin's management team will host a conference call on Wednesday, July 31, 2024, at 8:00 A.M. U.S. Eastern Time (8:00 P.M. Beijing/Hong Kong time on the same day) to discuss the financial results. In advance of the conference call, all participants must use the following link to complete the online registration process. Upon registering, each participant will receive access details for this conference including an event passcode, a unique access PIN, dial-in numbers, and an e-mail with detailed instructions to join the conference call.

**Conference Call Preregistration** <https://dpregrister.com/sreg/10191411/fd217ea0a4>

A telephone replay of the call will be available after the conclusion of the conference call until August 7, 2024. The dial-in details for the replay are as follows:

+1 877 344  
U.S.: 7529  
+1 412 317  
International: 0088  
Replay PIN: 2653168

A live webcast and archive of the conference call will be available on the Investor Relations section of Uxin's website at <http://ir.xin.com>.

## About Uxin

Uxin is China's leading used car retailer, pioneering industry transformation with advanced production, new retail experiences, and digital empowerment. We offer high-quality and value-for-money vehicles as well as superior after-sales services through a reliable, one-stop, and hassle-free transaction experience. Under our omni-channel strategy, we are able to leverage our pioneering online platform to serve customers nationwide and establish market leadership in selected regions through offline inspection and reconditioning centers. Leveraging our extensive industry data and continuous technology innovation throughout more than ten years of operation, we have established strong used car management and operation capabilities. We are committed to upholding our customer-centric approach and driving the healthy development of the used car industry.

## Use of Non-GAAP Financial Measures

In evaluating the business, the Company considers and uses certain non-GAAP measures, including Adjusted EBITDA and adjusted net loss from operations per share – basic and diluted, as supplemental measures to review and assess its operating performance. The presentation of the non-GAAP financial measure is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. The Company defines Adjusted EBITDA as EBITDA excluding share-based compensation, fair value impact of the issuance of senior convertible preferred shares, foreign exchange losses, other income/(expenses), dividend from long-term investment, structure realignment cost which was mainly severance cost, equity in loss of affiliates and dividend from affiliates. The Company defines adjusted net loss attributable to ordinary shareholders per share – basic and diluted as net loss attributable to ordinary shareholders per share excluding impact of share-based compensation, fair value impact of the issuance of senior convertible preferred shares, deemed dividend to preferred shareholders due to triggering of a down round feature and accretion on redeemable non-controlling interests. The Company presents the non-GAAP financial measures because they are used by the management to evaluate the operating performance and formulate business plans. The Company also believes that the use of the non-GAAP measures facilitates investors' assessment of its operating performance as this measure excludes certain finance or non-cash items that the Company does not believe directly reflect its core operations. The Company believes that excluding these items enables us to evaluate our performance period-over-period more effectively and relative to our competitors.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using Adjusted EBITDA is that it does not reflect all items of income and expenses that affect the Company's operations. Share-based compensation, fair value impact of the issuance of senior convertible preferred shares, other income/(expenses) and dividend from long-term investment have been and may continue to be incurred in the business. Further, the non-GAAP measures may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.

The Company compensates for these limitations by reconciling the non-GAAP financial measure to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating the Company's performance. The Company encourages you to review its financial information in its entirety and not rely on a single financial measure.

Reconciliations of Uxin's non-GAAP financial measures to the most comparable U.S. GAAP measure are included at the end of this press release.

## Exchange Rate Information

This announcement contains translations of certain RMB amounts into U.S. dollars ("US\$") at specified rates solely for the convenience of the reader, except for those transaction amounts that were actually settled in U.S. dollars. Unless otherwise stated, all translations from RMB to US\$ were made at the rate of RMB7.2203 to US\$1.00, representing the index rate as of March 29, 2024 set forth in the H.10 statistical release of the Board of Governors of the Federal Reserve System. The Company makes no representation that the RMB or US\$ amounts referred could be converted into US\$ or RMB, as the case may be, at any particular rate or at all.

## Safe Harbor Statement

This announcement contains forward-looking statements. These statements are made under the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as "will," "expects," "anticipates," "future," "intends," "plans," "believes," "estimates" and similar statements. Among other things, the business outlook and quotations from management in this announcement, as well as Uxin's strategic and operational plans, contain forward-looking statements. Uxin may also make written or oral forward-looking statements in its periodic reports to the SEC, in its annual report to shareholders, in press releases and other written materials and in oral statements made by its officers, directors or employees to third parties. Statements that are not historical facts, including statements about Uxin's beliefs and expectations, are forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to the following: impact of the COVID-19 pandemic, Uxin's goal and strategies; its expansion plans; its future business development, financial condition and results of operations; Uxin's expectations regarding demand for, and market acceptance of, its services; its ability to provide differentiated and superior customer experience, maintain and enhance customer trust in its platform, and assess and mitigate various risks, including credit; its expectations regarding maintaining and expanding its relationships with business partners, including financing partners; trends and competition in China's used car e-commerce industry; the laws and regulations relating to Uxin's industry; the general economic and business conditions; and assumptions underlying or related to any of the foregoing. Further information regarding these and other risks is included in Uxin's filings with the SEC. All information provided in this press release and in the attachments is as of the date of this press release, and Uxin does not undertake any obligation to update any forward-looking statement, except as required under applicable law.

Net loss per share for ordinary shareholders, basic	(0.06)	(0.43)	(0.06)	(0.66)	(1.11)	(0.15)
Net loss per share for ordinary shareholders, diluted	(0.06)	(0.43)	(0.06)	(0.66)	(1.11)	(0.15)

(i) Each senior convertible preferred share shall be convertible, at any time and from time to time from and after the applicable original issue date. The original conversion price for each senior convertible preferred share shall be US\$0.3433 per Class A ordinary share for the subscription in 2021.

The conversion price down round feature is triggered when the Company provides for a lower conversion price in subsequent convertible preferred offerings. The provision of a lower conversion price results in the repricing of existing convertible preferred offerings to match any such lower stated conversion rate.

At the closing of 2022 subscription in July 2022, the conversion price for each senior convertible preferred share issued were adjusted to US\$0.14 per Class A ordinary shares. In August 2023, Joy Capital exercised its warrants to purchase senior convertible preferred shares and the Company issued senior convertible preferred shares to Joy Capital at conversion price of US\$0.0457 per Class A ordinary shares. The conversion price for each senior convertible preferred share outstanding as of the date were further adjusted to US\$0.0457 per Class A ordinary share. On March 26, 2024, the Company issued senior convertible preferred shares to Xin Gao Group Limited at conversion price of US\$0.004858 per Class A ordinary share. As a result, the conversion price for each senior convertible preferred share outstanding as of the date was further adjusted to US\$0.004858 per Class A ordinary share.

The Company determined that, the reduction of the conversion price for senior convertible preferred shares in July 2022, August 2023 and March 2024 triggered the down round feature operative within the then existing senior convertible preferred shares. The fair value impact related to the reduction in the conversion price of the senior convertible preferred shares in July 2022, August 2023 and March 2024, amounting to RMB755.6 million, RMB278.8 million and RMB1,781.5 million respectively, was recorded as a charge to accumulated deficit and a credit to additional paid in capital in permanent equity.

(i) On September 24, 2021, a subsidiary of the Company, Youxin (Hefei) Automobile Intelligent Remanufacturing Co., Ltd. ("UXIN Hefei") entered into a lease and purchase agreement with Hefei Construction Investment North City Industrial Investment Co., Ltd ("Hefei Construction Investment") to set up an inspection and reconditioning center (the "IRC") in Hefei. Pursuant to the agreement, Hefei Construction Investment was responsible for the construction of the IRC and we will lease the IRC including the respective land use right after the completion of its construction with a 10-year lease term and a purchase option of the underlying assets. The IRC was completed and transferred to the Company on September 20, 2023.

(ii) On October 23, 2023, Hefei Construction Investment completed the transfer of the first-year rent of the IRC in Hefei into its investment of RMB147.1 million in UXIN Hefei and acquired 12.02% equity interests of UXIN Hefei with certain preferential rights. The investment was recognized as redeemable non-controlling interests.

(iii) On March 26, 2024, the Company entered into definitive agreements with Xin Gao Group Limited ("Xin Gao") and issued 1,440,922,190 senior convertible preferred shares at conversion price of US\$0.004858 per Class A ordinary shares for an aggregate amount of US\$7.0 million. As Xin Gao is controlled by Mr. Kun Dai, the Chairman of the Board of Directors and Chief Executive Officer of Company and the fair value of the senior convertible preferred shares is higher than the consideration received from Xin Gao, a share-based compensation expense of US\$4.0 million (equivalent to RMB28.7 million) equal to the difference between the fair value of the preferred shares issued and the consideration received was recorded in general and administrative expenses in March 2024.

On March 27, 2024, as agreed by all the preferred shareholders, all of the Company's 2,810,961,908 outstanding senior convertible preferred shares were converted into 54,960,889,255 Class A ordinary shares.

\* Share-based compensation charges included are as follows:
